

Your Trusted Database Services Partner

Pythian addresses challenges faced by Independent Software Vendors (ISVs) by easing and often eliminating potential burdens associated with databases and their management. A partnership with Pythian means:

- We can help ensure that your software is properly architected for its given database platform.
- Our certified DBA experts can assist your clients' individual implementations, meaning their database environments are properly configured for your software, integration and ongoing smooth operation.
- We can provide ongoing database management, support and knowledge transfer.

At Pythian, we plan, deploy and manage the entire underlying database infrastructure so that your clients' experience during your software deployment is a positive one.

Why Partner with Pythian?

- We are the recognized leader in remote database administration.
- We have some of the industry's top certified experts in Oracle, MySQL, and SQL Server on our team.
- With our **Partner Catalogue First Approach** we put your solutions first. Always. Your technology is front & center, and is treated as such. Pythian strives to learn as much about your software's interaction with the database as it can, to be fluently versed in your product, and represent it — as you would.
- Pythian provides detailed and up-to-the minute tracking of database activity accessible via our online interface.
- We offer highly competitive hourly rates with attractive margins for our partners.
- Pythian doesn't just alert, we **respond** to all database red-flags
- We're on, 24x7x365 at no extra cost to you or your client
